Subject Index

A

Acclimatization 231
Acetazolamide 66
Acetylcholinesterase inhibitor 15
– reactivators 8
Acetylcholine receptors 8, 15
Acid base balance 66
"Acidic" amino acids 218, 225
Acidosis 66
Aconitine 163
Action potential(s) 1, 342
Active salt transport 210
Activation of preganglionic axons 89
Acute volume expansion 110
Adaptation to low and high NaCl diets 301
ADH 101, 106
β-Adrenergic blocking agent 269
Age 254
Aldosterone 301
Alkalosis 66
Ambient temperature 231
Amiloride 54, 301
Amino acids 218, 225, 335
Amiodarone 79
Amphibian kidney 185
Amphiuma kidney 27
Anaesthetics 292
Anoxic core hypothesis 285
Antagonist of benzodiazepines 292
Antiarrhythmics 199
Antidiuretic hormone 101
Aplysia 8, 15
L-Arginine 335
Arterial chemoreceptors 95
– smooth muscle 342
Artery 1, 342
Artificial Zeitgebers 128
Aspartate 218, 225
Atrial diuresis 101

B

Barium 315
– ions 34
Basic amino acids 335
Basolateral membrane 325
Bessel function 238
Bicarbonate, CSF 66
Bird osmoregulation 301
Blood brain barrier 66
– flow 182
Body temperature(s) 128, 231
Bolus technique 176
Boyle's law 254
Brain temperature 138
Brattleboro strain 106
Bright light effects 85
Brunner's glad region 115
Brush border membrane vesicles 335

C

Ca^{2+} 163
Ca^{2+} influx 154
cAMP 192
Ca 154
Ca activities, extra-intracellular 144
Ca-antagonists 1, 342
Ca permeability 82
Calcium-dependent potassium current 179
– influx 82
Capillaries 350
Capillarity 350
Carbachol 15
Carbonic anhydrase inhibition 66
γ-Carboxyglutamate 225
Cardiac arrhythmias 79
– pacemaker current 265
– resting heat rate 285
– sodium channels 79
Carotid chemoreceptors 121
Carrier mediated uptake from lumen to cell 315
Cell membrane potential 192
Cellular sodium activity 34
Cerebrospinal fluid 66
Cervical sympathetic trunks 138
Chemoreceptor(s) 121
– reflexes 95
Chlordiazepoxide 292
Chloride (Cl) net reabsorption, renal 27
– fluxes, epithelia 263
– transport 325
Cholinergic receptors 115
Chromaffin cells 179
Circadian rhythms 85, 128
Cl fluxes, epithelia 263
Cl of the frog spinal cord 144
Clonazepam 292
Cold exposure 49
Collecting duct 297
Colon 301
Compensatory hypertrophy 260
Conscious dogs 101, 176
Contraction 1
Contracture 277
Control of breathing 269
Coprodeum 301
Cortical thick ascending limb 210, 315
– – – – of Henle's loop 308
Corticosterone 301
Cotransport 335
–, Na^+-2 Cl^--K^+ 210
– of Na^+, Cl^- and K^+ 315
Creatinine 176
Cross-bridges 277
Curare-like effect 8
Cyclic AMP 192
Cysteate 225
L-Cystine 335

D

2-Deoxyglucose uptake 60
Desynchronization 128
Diabetes insipidus 106
Diastole Starling's law 243
Dibutyryl-cyclic AMP 192
Diffusion distances 350
– limitation 285
Diltiazem 1
Distal tubule of kidney 34
Diuresis 101
Diuretics 210
Domestic fowl 301
Drug-receptor interaction 199
Duodenal acidification 115

E

Ear artery 1
Early distal tubule 185
Ecothiopate iodide 15
Elastic properties 254
– resistance 254
Electrogenic pump 72
Electrolyte excretion 301
– transport 54
Electroneutral sodium chloride cotransport 308
End-diastolic volume 243
Entrainment limits 128
Equatorial intensity 238
Equilibrium potentials 144
Erythropoietin production 174
Excitation-contraction coupling 1
Exercise 269
Experimental tetanus 277
Extra- and intracellular activities of K^+, Na^+, Ca^{2+} and Cl 144, 154

F

Fasting 174
Fast sodium channels 199
Fibre types 260
Flunarizine 1
Flurazepam 292
Food intake 231
Formaldehyde 199
Fractional desynchronization 128
Furosemide 27, 54, 210, 308
– -sensitive sodium chloride cotransport 34

G

Glia cells 144
Glomerular filtration rate 176
Glucose deficiency 277
Glucose-6-phosphate 60
Glutamate 154, 218, 225
α-Glycerphosphate dehydrogenase 49
Glycogen metabolism 60

Subject Index

A

Acclimatization 231
Acetazolamide 66
Acetylcholinesterase inhibitor 15
– reactivators 8
Acetylcholine receptors 8, 15
Acid base balance 66
"Acidic" amino acids 218, 225
Acidosis 66
Aconitine 163

Active salt transport 210
Activation of preganglionic axons 89
Acute volume expansion 110
Adaptation to low and high NaCl diets 301
ADH 101, 106
β-Adrenergic blocking agent 269
Age 254
Aldosterone 301
Alkalosis 66
Ambient temperature 231
Amiloride 54, 301
Amino acids 218, 225, 335
Amiodarone 79
Amphibian kidney 185
Amphiuma kidney 27
Anaesthetics 292
Anoxic core hypothesis 285
Antagonist of benzodiazepines 292
Antiarrhythmics 199
Antidiuretic hormone 101
Aplysia 8, 15
L-Arginine 335
Arterial chemoreceptors 95
– smooth muscle 342
Artery 1, 342
Artificial Zeitgebers 128
Aspartate 218, 225
Atrial diuresis 101

B

Barium 315
– ions 34
Basic amino acids 335
Basolateral membrane 325
Bessel function 238
Bicarbonate, CSF 66
Bird osmoregulation 301
Blood brain barrier 66
– flow 182
Body temperature(s) 128, 231
Bolus technique 176
Boyle's law 254
Brain temperature 138
Brattleboro strain 106
Bright light effects 85
Brunner's glad region 115
Brush border membrane vesicles 335

C

Ca^{2+} 163
Ca^{2+} influx 154
cAMP 192
Ca 154
Ca activities, extra-intracellular 144
Ca-antagonists 1, 342
Ca permeability 82
Calcium-dependent potassium current 179
– influx 82
Capillaries 350
Capillarity 350
Carbachol 15
Carbonic anhydrase inhibition 66
γ-Carboxyglutamate 225
Cardiac arrhythmias 79
– pacemaker current 265
– resting heat rate 285
– sodium channels 79
Carotid chemoreceptors 121
Carrier mediated uptake from lumen to cell 315
Cell membrane potential 192
Cellular sodium activity 34
Cerebrospinal fluid 66
Cervical sympathetic trunks 138
Chemoreceptor(s) 121
– reflexes 95
Chlordiazepoxide 292
Chloride (Cl) net reabsorption, renal 27
– fluxes, epithelia 263
– transport 325
Cholinergic receptors 115
Chromaffin cells 179
Circadian rhythms 85, 128
Cl fluxes, epithelia 263
Cl of the frog spinal cord 144
Clonazepam 292
Cold exposure 49
Collecting duct 297
Colon 301
Compensatory hypertrophy 260
Conscious dogs 101, 176
Contraction 1
Contracture 277
Control of breathing 269
Coprodeum 301
Cortical thick ascending limb 210, 315
– – – – of Henle's loop 308
Corticosterone 301
Cotransport 335
–, Na^+-2 Cl^--K^+ 210
– of Na^+, Cl^- and K^+ 315
Creatinine 176
Cross-bridges 277
Curare-like effect 8
Cyclic AMP 192
Cysteate 225
L-Cystine 335

D

2-Deoxyglucose uptake 60
Desynchronization 128
Diabetes insipidus 106
Diastole Starling's law 243
Dibutyryl-cyclic AMP 192
Diffusion distances 350
– limitation 285
Diltiazem 1
Distal tubule of kidney 34
Diuresis 101
Diuretics 210
Domestic fowl 301
Drug-receptor interaction 199
Duodenal acidification 115

E

Ear artery 1
Early distal tubule 185
Ecothiopate iodide 15
Elastic properties 254
– resistance 254
Electrogenic pump 72
Electrolyte excretion 301
– transport 54
Electroneutral sodium chloride cotransport 308
End-diastolic volume 243
Entrainment limits 128
Equatorial intensity 238
Equilibrium potentials 144
Erythropoietin production 174
Excitation-contraction coupling 1
Exercise 269
Experimental tetanus 277
Extra- and intracellular activities of K^+, Na^+, Ca^{2+} and Cl 144, 154

F

Fasting 174
Fast sodium channels 199
Fibre types 260
Flunarizine 1
Flurazepam 292
Food intake 231
Formaldehyde 199
Fractional desynchronization 128
Furosemide 27, 54, 210, 308
– -sensitive sodium chloride cotransport 34

G

Glia cells 144
Glomerular filtration rate 176
Glucose deficiency 277
Glucose-6-phosphate 60
Glutamate 154, 218, 225
α-Glycerphosphate dehydrogenase 49
Glycogen metabolism 60

H

^{3}H-DOPEG 1
Heart, Na channel 79
Heart's passive elasticity 243
Heat-exchange 138
Henle's loop 210, 315, 325
"High ceiling" diuretics 210
Histamine 54
Human circadian rhythms 85, 128
– limb arteries 254
Hydrogen ions 163
Hypertensive rats 72
Hypertrophied rat muscle 260
Hypnotic drugs 269
Hypothalamic neurons 23
Hypoxia 121, 277
– -induced erythropoietin 174

I

Impulse transmission through sympathetic ganglia 89
Internal sodium ions 179
Intestinal hormones 115
– motility 115
Intestine 301
Intracellular activity of K, Na, Ca, Cl 154
– electrical measurements 315
– ion-activities 144, 192
– recordings 342
– sodium activity 34
Inulin clearance 176
Ionic mechanism of GLUT depolarization 154
Ion fluxes 263
– sensitive microelectrodes 144, 154, 192
– substitutions 54
Isocapnic conditions 121
Isolated left ventricles 243
– patches 179
– perfused tubule 308

K

K 154
K activities, extra-intracellular 144
K secretion 185
K^+ activity 315
K^+-conductance 315
KCl contracture 277
KCl cotransport 325
Kidney 41, 210, 218, 225, 308, 315
–, blood flow 182
–, ion transport 192
–, K transport 297
–, NaCl cotransport 34
–, natriuretic factor 110
– of amphiuma 27, 185

L

Laser diffraction pattern 238
Left atrial distension 101
– ventricle(s) 60, 243
Light chains 260
– diffractometry 238
Limb arteries 254
Limits of entrainment 128
Liver mitochondrial α-glycerphosphate dehydrogenase 49
Lithium 106
Loop diuretics 210, 308
Lumbar sympathetic trunk 89

L-Lysine 335

M

Mechanoreceptor mechanisms 269
Medullary collecting duct 297
Melatonin threshold 85
Membrane potential 154, 192
– vesicles 335
Metabolic rate 231
Metabolism of resting rabbit papillary mucle 285
Microcatheterization 297
Microelectrodes 27, 144
Microperfusion 218, 225
Micropuncture 110, 218
Mitochondrial population 49
Modulated receptor model 199
Morphometry 350
Motoneurones 144, 154
Muscarinic 95
Muscimol 292
Muscle 260, 285
– cells 243
– fibres 238
Myocardium 350
Myosin ATPase 260
– transformation 260
Myothermic technique 285
Myocardial metabolism 60
Myocardium 277
Myofibrillar diameter 238

N

Na 154
Na activities, extra-intracellular 144
Na-free solutions 183
Na flux 199
Na fluxes, epithelia 263
Na^+ conductance 8
Na^+ coupled transport 192
Na^+ and Cl^- transport 54
NaCl depletion-repletion 301
NaCl transport 301
Na-Cl-K cotransport 308
Na-K-Cl_2 cotransport 232
Narcotic analgesic drugs 269
Nasal heat exchange 138
– resistance 138
Natriuretic factor 110
Necturus kidney 41
Nerve-evoked action potentials 342
– fibres 163
– terminal 1
Neuromuscular transmission 1
Neuronal membrane 8
Neuro-neuronal synapse 15
Nicardipine 1
Nicotinic transmission 89
Nifedipine 342
Nodal membrane 163
Node of Ranvier 163
Non-nicotinic synaptic mechanism(s) 89, 95
Noradrenaline release 1
Normocapnia 66
Nutrition 174

O

Olfactory cortex 292
L-Ornithine 335
Oscillogram 254
Osmoregulation 301
Ouabain 72
Oxime(s) 8, 15
Oxygen deficiency 277
– diffusion distance 350

P

Pacemaker 265
Pancreatic acinar cells 82
Papillary muscle 285
Perivascular nerve fibers 1
Permeability of sodium channels 163
Phosphorylated acetylcholinesterase reactivators 8
Plasma hormone levels 301
Polydipsia 106
Polyuria 106
Postganglionic vasoconstrictor neurones 89, 95
Postsynaptic inhibitory conductance 292
Potassium 34
– absorption 297
– adaptation 27, 185
– conservation 297
– current 179
– deficiency 297
– -induced vascular relaxation 72
– transport 27
– – in early distal tubule 185
Potential difference 41
Preganglionic axons 89
Pre-hyperpolarization 265
Preoptic and hypothalamic neurons 23
Pressure-volume relation 243
Progressive hypoxia test 121
Prolactin 301
Propranolol 269
Protons 163
Proximal tubular urine 110
– tubule 41, 192
– – of *Rana esculenta* 192
Pump-leak system 27
Purkinje fibre 265

Q

Q_{10} 285
Quantal release of acetylcholine 15

R

Rana esculenta 192
Rabbit kidney 210, 325
Rectum 301
Regulation of ventilation 121

Renal blood flow 182
– brush border membrane vesicles 335
– concentrating ability 106
– cotransport 325
– distal tubule, transport 27
– hypertensive rats 72
– NaCl cotransport 34
– potassium sensitive microelectrodes 185
– proximal tubule 335
– transport 218
– vasculature 72
Rete 138
Ro 15-1788 292
Rhythms 85

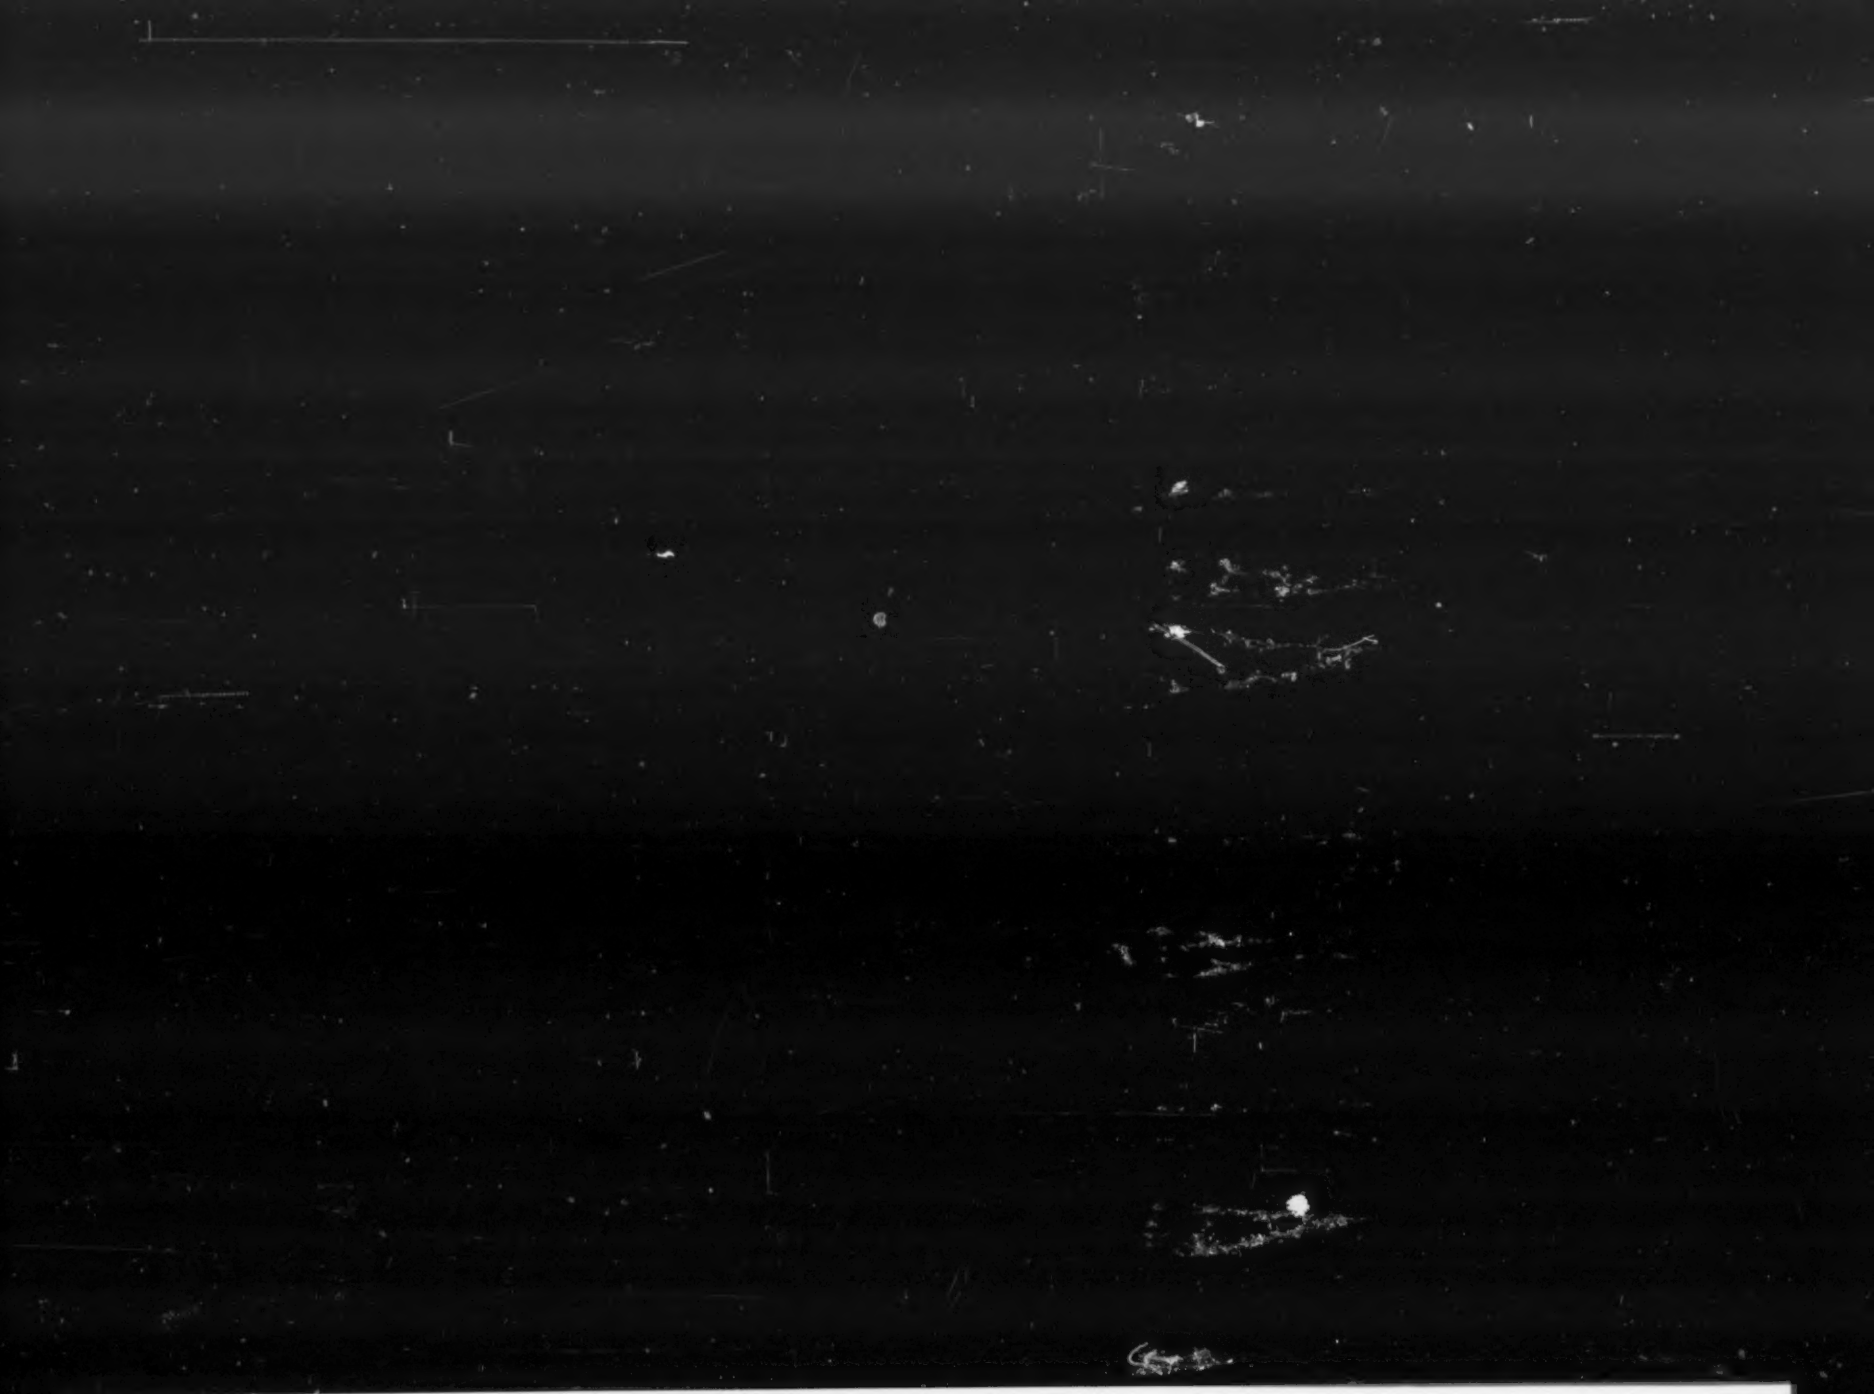
S
Scrotal thermal stimulation 23
1574 SEBC 8
Secretagogues 82
Serum thyroid hormones 49
Short circuit currents 301
Single channel currents 179
Skeletal muscle 95
– – fibres 238
– – and skin 95
Smooth muscle 72
Sodium 72
– channels 79, 199
– chloride cotransport 34, 308
– current 199
– fluxes, epithelia 263
– (Na) reabsorption, renal 27
– sensitive microelectrode 34
– transport 192
– – inhibitor 110
Spinal cord 144, 154
Starling mechanism 243
Stretch effect 285
Sympathetic efferent activity 138
– ganglia 95
– trunk 89
Synaptic transmission 8

T
Tail artery 72, 342
Temperature 285
– sensitive neuron 23
Tetrodotoxin (TTX) 163
Thermoregulation 138
Thick ascending limb of Henle's loop 308, 325
Thin preganglionic fibres 89
Thirst 106
Thyroid hormones 49
– state 49
TMB4 8
Toxogonin 8
Tracheal epithelium 54
Transepithelial P.D. 41
– resistance 315
Transmural gradient 60
Transporting epithelial 263
Transport inhibitions 54
Tryptaminergic receptors 115
TTX 1
Tubular resorption 225
– – of "acidic" amino acids 218

U
Urinary excretion 128

V
Vascular relaxation 72
– smooth muscle 1
Vasoconstrictor neurones 89, 95
Vasopressin 106
– -deficient diabetes insipidus 106
Ventilatory 269
– response 121
Ventricle 60
Ventricular myocardium 199
Vesicles 335
Vessel 254
Voltage clamp 163, 265
– dependent ionic conductances 8
Volume expansion 110
– regulation 101

X
Xenon washout method 182

W
Water deprivation 106
– intake 106


Z
Zeitgeber 85, 128
